            C               F               Am
Tell all the hunters to lay down their guns
                 C            G6           C
Tell 'em that the tiger needs a little bit of love
              C               F           Am
Let 'em run the jungle, let 'em roam their land
                  C               G6         C
Then stand back and marvel, what a beautiful cat
```
Chorus
```
                  F                     Am
'Cause I saw a tiger Now I understand
     C                G6         C
I saw tiger, and the tiger saw man
              C    F         Am
I can give them a home, safe and warm
                 C                 G6           C
But the law wants to ban me, can you tell me who's wrong?
               C           F           Am
Every time they move, every time they breathe
                 C             G6         C
I can feel their power, I can feel the heat
```

           C                     F         Am
Time is a-tickin', they'll soon be gone
                  C                 G6         C
So you better take a picture What a sad, sad song
             C                 F         Am
Call it armageddon, such a painful loss
                    C                 G6  C
When they kill all the tigers in the holocaust
```
Chorus
